CONSIS navigator

Willach | Pharmacy Solutions

HOW TO ADD DRUGS TO CONSIS

STEP 1.

Click the **Create product** tab at the bottom of the Navigator screen to access the stock card.

STEP 2.

- Scan the barcode of the new product.

- Click **Yes** to add.

STEP 3.

- The product details will self populate (name, code)
- Enter in the length of the product. Other dimensions are not needed.
- Use the Willach measuring tool to measure the package dimensions.
- Click **Save** OR **Add Channel** to assign drugs to available channels (see the next section '**How to add/assign channels**').
- Click **Save.**
- Refer to the next guide **How to Add/Assign Channel**

STEP 4.

The medications have now been added to the CONSIS system. They still need to be given a physical home or channel inside the robot.

Please refer to the next guide **How to Add/Assign Channels**

Hint: Add medication to Dispense software

- Remember to add new CONSIS drugs to the dispense software.
- Add the drug in the **Robotic list**, update the **Scheduler** or **Sync** the software with the machine.
